

Dear Colleague,

We are pleased to send you this *Call for Papers* for the **10th International Conference IAQVEC 2019 – (International Conference on Indoor Air Quality, Ventilation and Energy Conservation in Buildings)**, that will take place in **Bari – Italy**, between **September 5-7, 2019**.

IAQVEC is a premier international conference series, held once every three years, and hosted in different countries every time (in the past, it has been organized in Canada, France, China, Japan, USA, Czech Republic, and Korea). The conference covers a wide range of key research areas with the goal of improving the energy efficiency and sustainability of buildings.

IAQVEC 2019 will be dedicated to **Healthy Nearly Zero Energy Buildings**, and will be organized around the following five streams:

- Ventilation and measurement techniques
- IAQ and Indoor Environmental Quality
- HVAC systems
- Smart Technologies for ZEBs
- ZEBs: design and energy modelling

IAQVEC 2019 will be a major international event, attracting delegates from around the world. So far the meeting has received support from many national and international societies, including AiCARR, Architectural Institute of Korea, Associazione della Fisica Tecnica Italiana, Associazione Termotecnica Italiana, CIB, IBPSA-Canada, REHVA, The Society of Heating, Air conditioning and Sanitary Engineering of Japan, and many others.

This milestone anniversary of the IAQVEC conference will be organized in a beautiful Mediterranean city. We are sure that the South of Italy will offer a fantastic backdrop of landscape and architecture, merged with outstanding food that the delegates will enjoy while they participate in the scientific program at IAQVEC 2019. Prof. Francis Allard has agreed to chair the scientific committee that will see the presence of worldwide leading researchers coming from 14 countries.

The conference proceedings will be published and indexed in leading databases (such as Scopus, Google Scholar, and others). Special issues have already been confirmed with several journals including Sustainable Cities and Society (Elsevier), Science and Technology of the Built Environment (T&F), Building Simulation (Springer). The editors-in-chief of these journals have secured the participation to IAQVEC 2019, which promises to be a milestone event for scientific networking.

Abstracts of maximum 300 words (in English) may be **submitted** using the conference system. The deadline for abstract proposals is November 1, 2018.

For further information, please visit the conference webpage: www.iaqvec2019.org

We look forward to welcoming you in Bari. Should you have any further questions or need additional information, please do not hesitate to contact the IAQVEC 2019 Organizing Committee at info@iaqvec2019.org

Sincerely yours,

Dr. Umberto Berardi
Conference Organizing Committee
Ryerson University, Toronto, ON
