Deadline for manuscript
submissions:

10 June 2019

Message from the Guest Editor

This Special Issue will explore recent analyses and developments across the quickly expanding fields of energy efficiency and environmental performance of buildings, taking into consideration all the implications of the emerging methodologies with the latest frontiers on multi-objective investigations. Related contributions may also concern the study of the reliability, quality, and environmental impact of distribution systems on the final use of energy. After all, the broad range of topics reflects the diversity of interests in this field.

The aim of this Special Issue is to collect original research manuscripts as well as review articles on the most recent developments and research efforts in energy demand and consumption of existing and future buildings, with the purpose of providing guidelines for forthcoming research directions. In this context, it also provides a unique forum by bringing together invited contributions from eminent experts in the context of the evolving relationships between research communities, funders, and stakeholders.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex, Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 6.0 days (median values for papers published in the first six months of 2018).
