

CEES2020

8 – 11 SEPTEMBER
Coimbra, Portugal

Construction, Energy Environment & Sustainability

INTERNATIONAL CONFERENCE

CEES 2020 is taking place in Coimbra, Portugal, from 8 to 11 September 2020, and is being organized by Itecons. Globally, as we face resource scarcity, climate change and increased urbanization, there is a pressing need to move towards a sustainable construction activity and a sustainable built environment. In order to achieve this, professionals from a wide range of backgrounds need to work together and take a cross cutting approach to developing innovative solutions and tackling the challenges facing the existing building stock.

We encourage construction, energy and environment researchers, engineers, planners, stakeholders, policy makers and other experts to submit an abstract for presentation at CEES 2020. We are looking for research on a wide range of multidisciplinary topics arranged within six general themes:

**CONSTRUCTION MATERIALS AND TECHNOLOGIES; BUILDING PHYSICS;
ENERGY; ENVIRONMENT; CONSTRUCTION AND INDUSTRY 4.0;
COMMUNITY CHALLENGES AND POLICIES.**

We are also inviting distinguished members of the scientific community to organize special thematic sessions focusing on a topic of their choice that fits in with the general scope of the CEES 2020 conference.

CALL FOR ABSTRACTS KEY DATES

SUBMISSION OF ABSTRACTS
15th May 2020

NOTIFICATION OF ACCEPTANCE
29th May 2020

**FINAL ABSTRACT/
PAPER SUBMISSION**
3rd July 2020

CONFERENCE CHAIRPERSONS

António Tadeu
Itecons, University of Coimbra, Portugal
Jorge de Brito
IST, Universidade de Lisboa, Portugal

ABOUT ITECONS

Itecons — Institute for Research and Technological Development for Construction, Energy, Environment and Sustainability — is a non-profit organization grounded in the campus of the Faculty of Sciences and Technology of the University of Coimbra established in 2006 to act as a dynamic interface of technology, knowledge and know-how between the scientific community and the industry. We provide applied research, testing, consultancy and training services in the fields of construction, energy, environment and sustainability.

CONFERENCE VENUE

Coimbra, which is located in the center region of Portugal on a hill by the Mondego River, has a rich history. In Roman times, the city was called Aeminium. Later, during the Middle Ages, Coimbra was the capital of Portugal. During the Renaissance, it was transformed into a place of knowledge, when Dom João III moved the University to the city and numerous colleges were created. In 2013, these historical buildings were classified as a World Heritage site by UNESCO.
